Preface

The NowForce advanced dispatch and response technology provides comprehensive situational awareness. NowForce allows dispatchers, responders and third-party resources to share insights in real-time, creating faster response times to potential threats and active incidents. NowForce leverages an integrated system of live and historical event data, state-of-the-art mapping, and tailored mobile applications for responders' and reporters' input to ensure that the closest, best equipped and most appropriate personnel is dispatched.

Contacting Cognyte Service and Support

At Cognyte, we value our users and partners, and we strive to continuously improve the customer service experience. Cognyte Smart Support™ ensures 24/7, on-demand service and support. Enter support requests, access training and troubleshooting tips, initiate RMAs, check warranty status, access resources, and more.

If you encounter any type of problem after reading this document, contact your local distributor or Cognyte representative. For the main service and support page on the Cognyte web page, visit: <https://www.cognyte.com/contact>

Overview

The NowForce Bulk Upload Utility enables you to create multiple entities in the NowForce system simultaneously, by uploading the entities as rows a worksheet (tab). You can upload the following entity types: Groups, Incident Types, Incidents, POIs, Beacons, Geofences, and Users.

Note

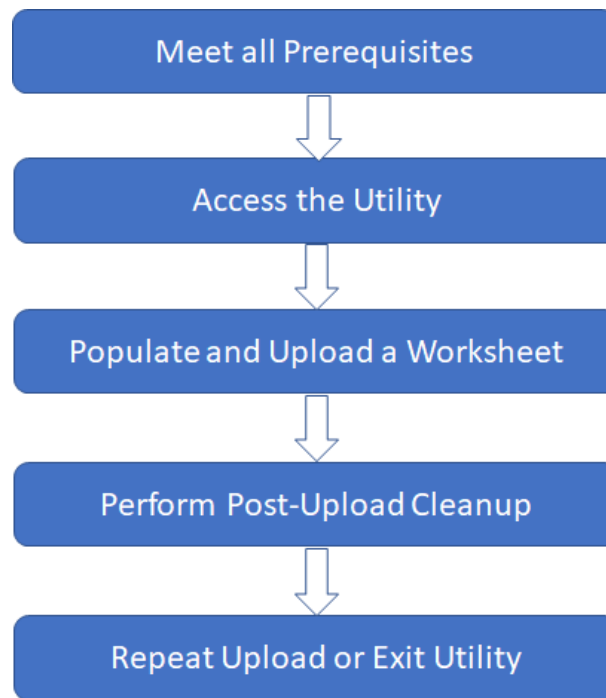

- This utility does not delete or modify existing entities.
- Rollback is not supported after upload.

This guide explains how to use the Bulk Upload Utility. It is intended for administrators who have prior experience with creating entities in the various NowForce system modules.

About this Document

The high-level and detailed steps recommended in this document for using the Bulk Upload Utility are summarized below.

High-Level Flow

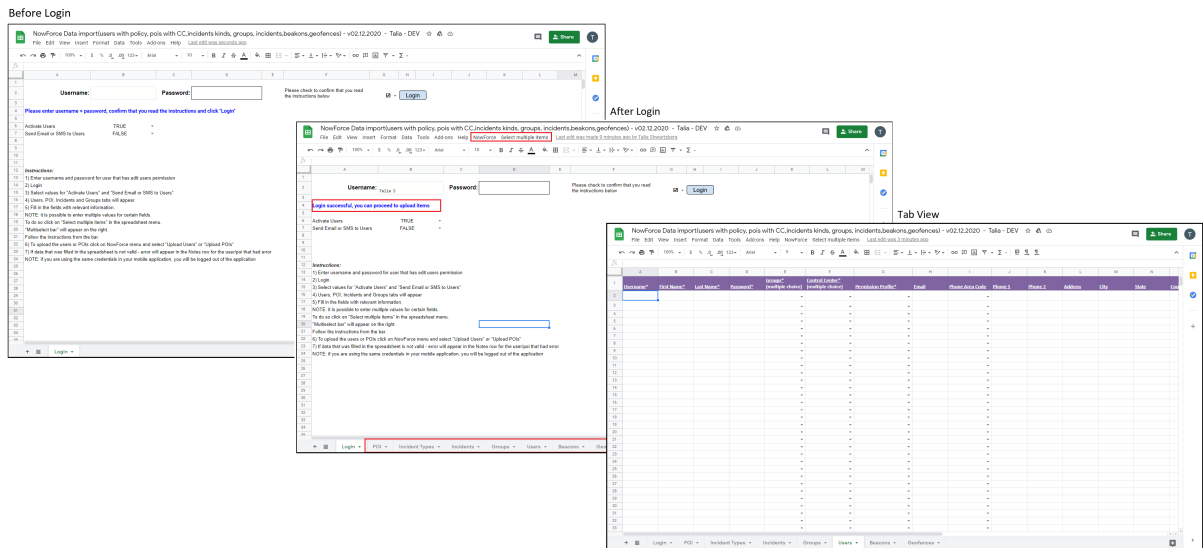

Detailed Flow

Utility Layout and Views

The NowForce Bulk Upload Utility is a Google Sheets online spreadsheet accessed via a link.

It comprises a login tab and seven additional tabs for each of the NowForce entity types supported by the utility.

For Google Sheets terminology and usage, see [Google Support](#).

Prerequisites

To receive and use the Bulk Upload Utility, you must have:

- A Google account with a Gmail address.
- A NowForce user account.
- Administrative user credentials.

Requesting the Utility

Email a request for the utility and your Google account details to the NowForce Support team. For contact information, see "[Contacting Service and Support](#)" (page 1).

Logging into the Utility

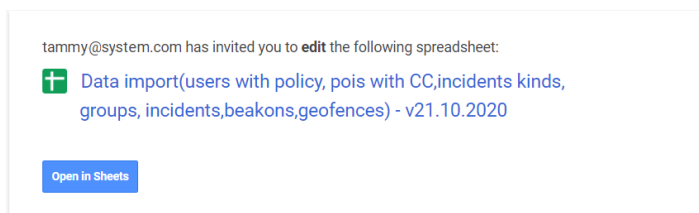

This section explains how to log into the Bulk Upload Utility with your NowForce administrator username. As a best practice, always log in immediately before using the utility, regardless of previous usage.

Note the following limitations prior to login:

- You cannot log into the Bulk Upload Utility and NowForce system at the same time with the same username. Logging into one will log you out of the other.
- You cannot log into more than one instance of the spreadsheet with the same username. Logging into one instance will log you out of the other.

▼ To log into the Bulk Update Utility

1. Open the email you received from NowForce and click **Open in Sheets**.

Tip

You can optionally save the link as a favorite in the browser for future access. However you must be logged in to your Google account to update the spreadsheet.

2. Enter your system administrator username and password in the corresponding fields.

	A	B	C	D	E	F	G	H	I	J	K
1											
2		Username:	<input type="text"/>	Password:	<input type="password"/>	Please check to confirm that you read the instructions below	<input type="checkbox"/>	Login			
3											
4		Please enter username + password, confirm that you read the instructions and click 'Login'									
5											
6		Activate Users	TRUE	-							
7		Send Email or SMS to Users	FALSE	-							
8											
9											
10											
11											
12		Instructions:									
13		1) Enter username and password for user that has edit users permission									
14		2) Login									
15		3) Select values for "Activate Users" and "Send Email or SMS to Users"									
16		4) Users, POI, Incidents and Groups tabs will appear									
17		5) Fill in the fields with relevant information.									
18		NOTE: it is possible to enter multiple values for certain fields.									
19		To do so click on "select multiple items" in the spreadsheet menu.									
20		*Multiselect bar* will appear on the right.									
21		Follow the instructions from the bar.									
22		6) To upload the users or POIs click on NowForce menu and select "Upload Users" or "Upload POIs"									
23		7) If data that was filled in the spreadsheet is not valid - error will appear in the Notes row for the user/bot that had error									
24		NOTE: If you are using the same credentials in your mobile application, you will be logged out of the application									
25											

3. Select the **Please check to confirm that you read the instructions below** checkbox. To

do so, click the field and select the lower option.

4. Click the **Login** button adjacent to Username and Password.

Caution

Login fails if the Username or Password cells are still selected. Click elsewhere in the spreadsheet and then click **Login** again.

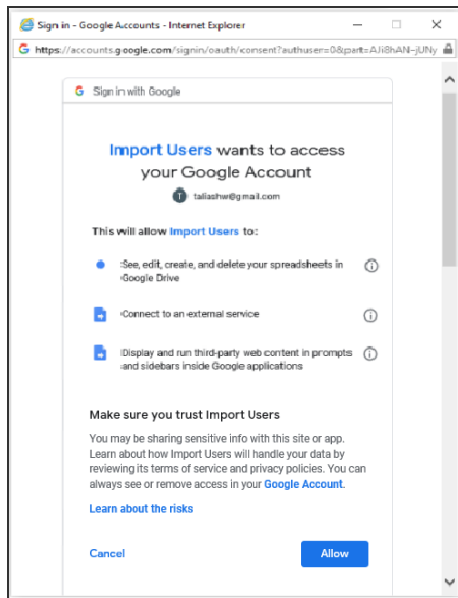

5. If you are logging in for the first time, do the following:

- a. In the Authorization Required window, click **Continue** to give your account access to the spreadsheet.

- b. If you have more than one Gmail account, double-click the relevant account in the **Choose an account** window.

- c. On the **Import Users** page, click **Allow** to link your system user to the Gmail account.

6. Wait until the authentication script completes and you receive the message "Login successful, you can proceed to upload items".

Changing Default User Settings (Optional)

If you are uploading User entities, you can optionally change the **Activate Users** and/or **Send Email or SMS to Users** default values prior to upload. These settings are located on the Login worksheet apply to all entities in the Users worksheet. This can be done either before or after login.

▼ To change the default user settings

1. Open the spreadsheet and log in if preferred. For details, see "[Logging into the Utility](#)" (page 8).
2. From the **Activate Users** dropdown list, select an option:
 - True (default) - To automatically activate all users after they have been uploaded. Each user will then be able to log into the NowForce modules for which they have privileges.
 - False - To upload the users without activating them. The administrator will then need to activate each user separately in the Users panel of the Dispatcher module.
3. From the **Send Email or SMS to Users** dropdown list, select an option:

- False (default) - To activate users without notifying them.
- True - To send an activation notification to users via email and/or SMS.

Tip

A user can receive an email notification if an email address has been added in NowForce. A user can receive an SMS notification if the telephone number has been added in the system and an SMS Gateway has been defined for the organization.

The SMS Gateway is configured in the Interfaces page of the NowForce Administrator module. For details, see [How to Configure the Text Messaging Gateway in the Dispatcher](#).

4. Click another cell elsewhere on the page to save the changes.

Populating and Uploading a Worksheet

This section explains in general how to add and upload entities in a worksheet. The utility lets you upload one worksheet at a time. For best practices, leave all other worksheets empty.

Before starting, carefully read "[Appendix A: Entity-Specific Upload Guidelines](#)" (page 14) for further details about the entity type you are uploading.

Tip

- You can upload up to 100 records at a time in a worksheet.
- Selecting a cell creates a border with a color assigned to you. If you see different colored borders, then more than one system-defined user is currently updating the spreadsheet. This is not recommended as it can lead to errors.

- After adding information into the NowForce system (either directly or via the Bulk Upload utility) you must log into the utility again to see the updates.

▼ To add records to a worksheet

1. Log into the Bulk Upload utility. For details, see "[Logging into the Utility](#)" (page 8).
2. Open a worksheet by clicking its tab at the bottom of the spreadsheet.

- 3. Manually add each new record as a row by entering data in the cells. Instructions are displayed in the column header, where relevant.

Tip

- For instructions on the different cell types, see "[Appendix B: Cell-Specific Editing Guidelines](#)" (page 16).
- For mandatory dropdown lists, ensure that the value you require exists in NowForce.

- 4. Exit the cell by clicking elsewhere. Your update is saved automatically.
- 5. Upload the records by selecting **NowForce > Upload [Entity Name]**.

Performing Post-Upload Cleanup

After upload, the Import Status field for a record will display any of the following outcomes:

- Success - A green Import Status cell indicates that the row was uploaded successfully.
- Failure - If upload failed for the row, the error reason is displayed in the Import Status field together with an indication of the error in red anywhere in the row.
- Empty - Indicates that timeout occurred before the upload script reached this and subsequent records.

	B	C	D	E	F	G	H	I	T
1	First Name*	Last Name*	Password*	Groups*	Dispatch Center*	Permission Profile*	Email	Phone Area Code	Import status
2	Alan	Jones	AJones	20270 2, 141	5475 center Aa	19656 Responder	AJones@ajones.com	United States +1	Success
3	Bhupinder	Singh	BSingh	14990 Stude	6144 center C	19660 Reporter Active	BSingh@bsingh.com		Success
4	Celia	Smith	CSmith	14992 Dispat			CSmith@csmith.com		Missing mandatory fields
5	Anita	Jones	AJones	14989 Secur	5554 center B	27560 employee	AJones@ajones.com		Username already exists
6									

Delete all successful records and correct any that returned an error. Then upload the fixed and omitted records.

Tip

- If the error reason is unclear, open a ticket for the NowForce Support Team with the error details.

- If all records were uploaded successfully, delete them all to prepare the spreadsheet for subsequent usage.

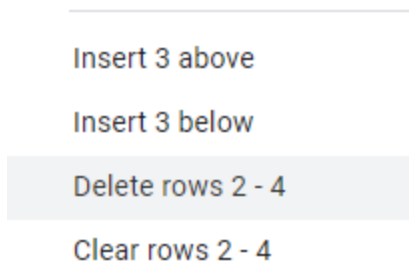

▼ To handle records following an upload

1. Highlight and delete successfully uploaded records:

a. Click the row number of the top record and move the hand-shaped cursor downwards.

	A	B	C	D	E	
1	Group name*	Group Icon (default icon added if nothing is selected)	Created in Control Center*	Group Code	Assign PTT channel	Import status
2	Ambulance-S	816237 	3305 Main C.C._MainCC		No	Success
3	Ambulance-E	816480 	3305 Main C.C._MainCC		Yes	Success
4	Ambulance-W	876632 	3305 Main C.C._MainCC			Success

b. Right click anywhere in the selection and choose **Delete rows**.

2. Upload the worksheet with the fixed and unloaded records. For details, see "[Populating and Uploading a Worksheet](#)" (page 11).

Exiting the Utility

After logging out you will no longer see the NowForce and Select Multiple Items menus, nor values in the dropdown lists. All changes made to the entity worksheets during the session are saved automatically.

Either of the following will log you out of the utility:

- Closing the tab.

- Logging into the system or mobile app with the same username.

Appendix A: Entity-Specific Upload Guidelines

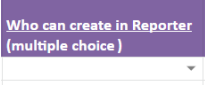

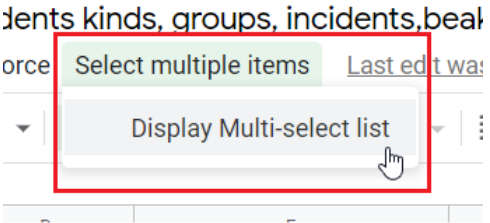

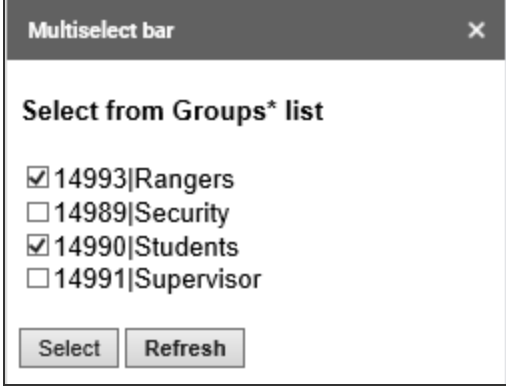

When adding and uploading entities, pay attention to the following for each entity type.

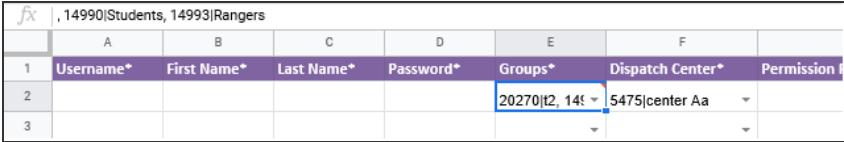

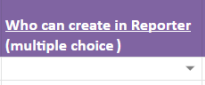

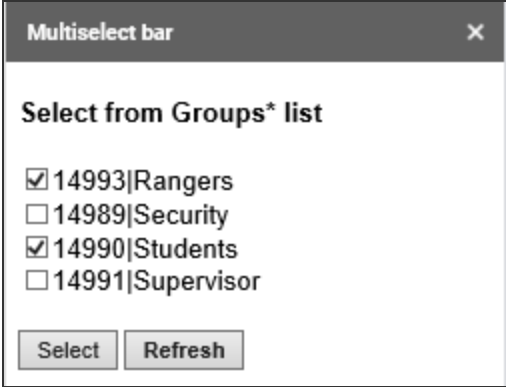

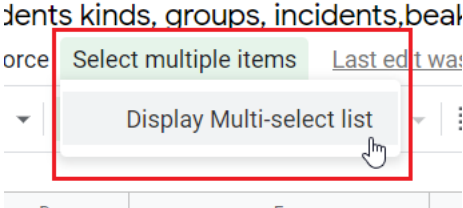

Entity Type	Prerequisites/Limitations	More Information
Upload Groups	<ul style="list-style-type: none"> • Upload Groups before uploading Users. • Assign PTT Channel - If empty, the default is No. • Group Code - Only accepts numeric values. 	Creating New Groups
Upload Incident Types	<ul style="list-style-type: none"> • Upload Incident Types before uploading Incidents. • Address, Latitude/Longitude and POI Location - For details on dependencies between these cell values, see "Appendix B: Cell-Specific Editing Guidelines" (page 16). 	Managing Incident Types
Upload Incidents	<ul style="list-style-type: none"> • Alert Dispatchers on Creation/Activation - If empty, the default is 'No'. • Address, Latitude & Longitude, and POI Location - For dependencies between these cells, see see "Appendix B: Cell-Specific Editing Guidelines" (page 16). 	Creating a New Incident
Upload POIs	<ul style="list-style-type: none"> • Address and Latitude/Longitude - For dependencies between these cells, see "Appendix B: Cell-Specific Editing Guidelines" (page 16). 	Adding and Managing Points of Interest (POIs)
Upload Beacons	<ul style="list-style-type: none"> • NowForce recommends Eddystone beacons. These are included by default in the utility. 	NowForce Indoor Positioning Planning and Installation Guide
Upload Geofences	<ul style="list-style-type: none"> • Supports circular geofences with focal address and radius only. Point geofences are not supported. 	Creating and Editing Geofences/ Areas of Interest (AOIs)
Upload Users	<ul style="list-style-type: none"> • Optionally change the following default values on the login page before upload: <ul style="list-style-type: none"> • Activate Users • Send Email or SMS to Users 	Adding and Managing Users

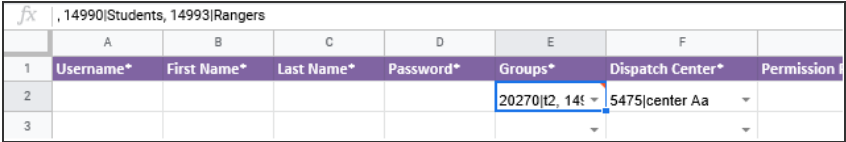

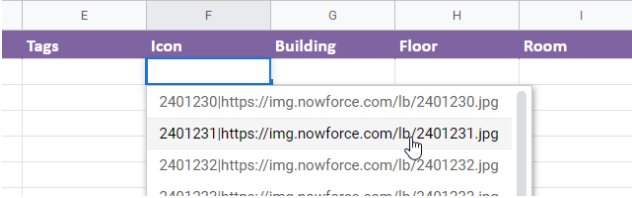

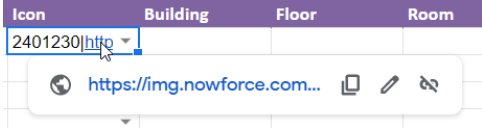

Entity Type	Prerequisites/Limitations	More Information
	<p data-bbox="461 260 959 333">For details, see "Changing Default User Settings (Optional)" (page 10).</p> <ul data-bbox="431 365 943 527" style="list-style-type: none"><li data-bbox="431 365 943 438">• The Username must be unique across all NowForce modules.<li data-bbox="431 457 943 527">• Control Center is not relevant for app users.	

Appendix B: Cell-Specific Editing Guidelines

This table presents the different cell types and how to use them.

Cell Type	Usage
<p>Mandatory</p> 	<p>Indicated by an asterisk in the column heading. Leaving these cells empty will give an error during upload.</p>
<p>Free text</p> 	<p>Select the cell and type a value. If a certain format is required, for example for adding a date, instructions are provided in the column heading.</p>
<p>Dropdown list - single choice</p> 	<ul style="list-style-type: none"> • Click the arrow and select a value from the list. • For some dropdown lists values may differ according to user privileges.
<p>Dropdown list - multiple choice 1</p> 	<p>Multiple Choice in the column header indicates that more than one value can be selected from a dropdown list. The options are listed in the Multiselect bar.</p> <p>To choose more than one option:</p> <ol style="list-style-type: none"> 1. Select the cell. 2. Click Select Multiple Options > Display Multiple Options .  <p>ents kinds, groups, incidents, beal orce Select multiple items Last edit wa: ▼ Display Multi-select list</p> <ol style="list-style-type: none"> 3. In the Multiselect bar:  <p>Multiselect bar [X]</p> <p>Select from Groups* list</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> 14993 Rangers <input type="checkbox"/> 14989 Security <input checked="" type="checkbox"/> 14990 Students <input type="checkbox"/> 14991 Supervisor <p>Select Refresh</p> <ol style="list-style-type: none"> a. If the bar still displays a previously selected list, click Refresh. b. Click the required values and then click Select.

Cell Type	Usage
	<p>The values are listed in the text bar for the selected cell.</p> 
<p>Dropdown list - multiple choice 2</p> 	<p>Multiple Choice in the column header indicates that more than one value can be selected from a dropdown list. The options are listed in the Multiselect bar.</p>  <p>To choose more than one option:</p> <ol style="list-style-type: none"> If the Multiselect bar is not already open from a previous selection: <ol style="list-style-type: none"> Select the cell. Click Select multiple options > Display Multi-select list.  <ol style="list-style-type: none"> In the Multiselect bar, click the required values and then click Select. If the Multiselect bar is open from a previous selection: <ol style="list-style-type: none"> Select the cell and then click Refresh. Click the relevant values and then click Select.

Cell Type	Usage
	<p>The values are listed in the text bar for the selected cell.</p> 
<p>Dropdown list - icons</p> 	<p>Icons are listed by JPEG filename. If no icon is selected, a default icon defined by your organization will be used.</p>  <p>To see an icon:</p> <ol style="list-style-type: none"> Select the filename from the dropdown list. Hover over the link in the cell to display the edit bar.  <ol style="list-style-type: none"> Click the link in the edit bar to display the icon. 
<p>Address, POI and Latitude & Longitude fields</p>	<ul style="list-style-type: none"> • Include city and country in the Address cell to minimize auto-correct errors and enhance accuracy. • Adding an address auto-completes Latitude and Longitude if these cells are empty. • If both the Address cell and Latitude and Longitude cells have values, Latitude and Longitude take precedence.
